ISUC (International Standard University Code) is an international system designed by ISE (UK) and accredited by ISCN system intended to be used by (universities, colleges, scientific research institutions, and scientific journals) all over the world; which will increase the reputation for the coded institutions, to get a high rank amongst the others, as you could see in the upcoming sections in these papers.

ISUC consists of the institutions Metadata, while a globally unified algorithm will generate a code for each registered institutions, in addition to a QR code.

ISUC implies a wide range of benefits for all parties of the academic process, as the following:

ISUC contributes to facilitating the management operations for all institutions which are interested in the credibility of educational and academic institutions.

ISUC is committed to ensuring that our services are of the highest quality and are free from bias.

Statistics and Needs:

In Europe 2016, one of the most important and biggest *countries suffered from losses related to forgery as below:

Total fraud losses equal £ 1.1 billion.

320,900 confirmed fraud cases.

Over 60% of the confirmed fraud cases were employment frauds.

43% of people are lying about their education, former employment or qualifications.

The fraud of personal identity was rated as the most harmful fraud in results of new

Researches with 88% of all identity fraud being committed online.

148,463 victims of identity fraud.

Why do you need an (ISUC)?

There are too many fake certificates, licenses or even academic institutions in the world. This service oriented to protect any possible victims of fraudulent institutions (swindled or deceived).

We are offering a business solution and aiming to create high academic reputation to increase the international student ratio which will help the ISUC holders to gain a higher ranking and higher academic accreditation.

ISUC Benefits

Individual Service (Community Service)

International Identity

Guaranteeing an international distinguished identity for each institution.

Descriptive Data of Institutions (Metadata)

Creating an accurate and useful method to define the institutions and their related Metadata in the databases of bibliographic information.

Global Reliability and Academic Reputation

Increasing the reliability and validity of the institutions on a global level.

Anti-counterfeiting

Preventing confusion and fraudulent institutions through the unified number that Ensures the verification of data.

Facilitate Data Flow

Tracking and managing flow of certificates between institutions, companies and Individuals using the ISUC and verification gateway.

Protected Archiving system for Verified Documents.

Keeping an electronic copy of verified documents for each ISUC holder.

Employee Reputation (Improve HR Management)

Helps human resource managers to choose the most efficient and trusted people more quickly and with less effort.

At First Sight

Obtaining important information regarding the institutions easily by looking at the unified Code, for example institution country, activity, granted certificate type, etc..

International Standard University Code Benefits:

ISUC illustrates coverage, consistency and expertise to the higher education institutions offering:

Universally recognised identification for thousands of unique higher education institutions.

Coverage of addresses and verified contact information which is crucial to institutions changing needs.

Keeping universities up-to-date with the latest technology advances in the rapid and fast changing global gateway of information.

Paving the way for cooperation amongst universities in terms of teaching methods, scientific research, and market needs.

ISUC is the essential approach for coding the majors as well as the faculties in the academic institutions all over the world, based on syllabus contents; regardless of the majors or faculties' names, which will imply a great benefit for all involved parties.

Joining the standardised institutional contact centre; enables universities to communicate and correspond directly via a shared standardised environment.

Unified international standardised coding for all higher education institutions.

Facilitates access for all institutions and individuals to university portals and online education.

Gives universities the edge to promote their programmes and spike student-enrolments from all over the globe

ISUC gives the university access to the ISCN system to generate a unique international code for all documents and certificates to protect it, against forgery with full encryption.

ISUC Beneficiaries

Educational Institutions:

Education institutions benefit from the enhanced credibility, eliminating the possibility of fraudulent entities running scams in their names, forgery in all forms.

The international identifier, a cryptic platform where all members can communicate freely throughout the globe, in a cost-and time- effective manner, to light speed solutions and decisions across all fields, It also spikes international student enrolments, while the evaluation gateway enhances the quality control element, "boosting quality and magnifying feedback"

Students (Future Student, Current Students, and Alumni)

Students can access authentic and detailed information without the fear of being tricked by blacklisted universities, fake institutions and uncredited organisations. Giving international students the option to easily compare/evaluate universities, decide on majors that best fit their life choices and needs. Alumni and fresh graduates can elevate chances of starting a job much quicker, avoiding the downtime forced by employer (Human resources) certificate and credentials examinations. All that put together, constructing a trustworthy, doubt-free environment.s.

Governmental and Private Sectors Parties

Aiding governments to distinguish establishments through the unique international identifier, easing communications between said parties greatly.

Amplifying statistical production, supplementing market needs, while factoring in educational quality control indicators. A unified database accessible whenever for all urgent needs. Raising the bar of certificate verification, while simplifying the process

ISUC structure

ISUC code contents

ISUC consists of 13 character code divided into four parts; the first three parts help to obtain important information regarding the institutions easily by looking at the ISUC, for example; the country from which the certificate was issued, institution (donor) activity, certificate type."

The last part represents the main code stored in the system enabling the possibility of reaching the institution anytime and anywhere, it also helps to create a short and clear definition which is directly linked to an automatically reading QR code.

Code Creation Algorithm

Types of codes:

The system uses a special algorithm to randomly generate codes and the most important codes it generates:

ISUC, a unique 15-character code (letters and numbers in English) consisting of four parts. Each part is separated by a special symbol (-). This number given to the institutions after verifying their authenticity.

The ISUC, code of 6 digits (three letters and three digits in English) given to institutions and establishments after verifying their credibility and appears in the last part of the ISUC code.

QR code (Quick Response Code), this code is generated to be associated with the previous two symbols to facilitate access to data and reports automatically without writing codes on the website

Examples of codes:

ISUC code USA-EDU-ACD-XTT446

ISUC UNIQUE CODE : XTT446

QR code:

*in addition to the above, the registered institutions will get a self-managed platform contains the following features:

Verification Gateway Service

Governments, public institutions and private sector organisations worldwide all recognise that one of the biggest threats to security, service quality and stakeholders is unqualified staff using fake certificates, professional credentials and legal documents. At ISUC we help entities – regardless of their industries – safeguard their operational integrity and communities.

With a global network of issuing authorities, as well as an extensive team of research, analysis and experts and we do verification of the qualifications and legal status of the professionals serving your organisation.

Enabling you to make fact-based decisions and take corrective measures where necessary. We also provide proprietary databases and international watch lists for organisations.

Higher education institutions can ask for an online portal to add certificates faster and at a lower cost than for individuals.

All you have to do is register for ISUC and activate your own verification gateway.

ISUC gives you a platform through which to add important documents and certificates for the university, this in turn is documented through an international system (ISCN)

Evaluation Gateway

As mentioned previously, ISUC gives you a platform through which to add important documents and certificates for the university, which is documented through an international system (ISCN) furthermore we have created "Evaluation Gateway" It allows the management of the university to create an internationally certified evaluation.

The evaluation aims to focus on the elements of quality and level of services provided to the ISUC holder.

Pricing

ISUC designed to be paid upon subscription which will enable the institutions to handle the full features with the lowest possible cost.

The fees for ISUC are (8300 US Dollar) for two years license subscription.

ISUC Designed in accordance with the following Certificate and shields

Complies with General Data Protection Regulation (GDPR)

ISO 27001 certificate
(information security management system).

ISUC is compatible with digital data protection regulations all over the world.
